- 7 Orphanage Project
- 8 Drinking Water Bore wells
- 10 ICDP Programme
- 11 Our Appeal & Petition

The following pages reflect the commitment in rendering the services to uplift and develop the poorest, backward community and achieving goals since 15 years.

The lives of many children have been transformed through tirelessly services and many children have come to a sustainable position. Hoping to resolve and to unite with others to create a better society for the children.

As I walk along with people in my journey I see how human beings equip themselves with the things they need. Some are well flourished with all the basic needs like rich and nourishing food, safe drinking water and hygienic atmosphere. They Care about their health and schools for their children education enjoying their lives with contentment.

In the same walk way there are some human beings also live along with not enough food and clean water to drink and they live in most unhygienic conditions.

Many times, I question to myself that God as created human beings equally and why is this difference in living conditions? Where does this discrimination come from who is responsible for this circumstance? I feel that each individual as equal right to live in this world enjoying equal standards.

I have come across many children without proper food, clothing, shelter, malnourished and not having basic education. I had a vision to improve the standard living conditions of these poor communities to take them to a sustainable position. Who help themselves to meet their needs.

We had the opportunity to serve downtrodden lives by giving timely assistance.

We have undertaken several programs in upliftment of the poor community. We have provided hostels for their orphan children, free education through schools, safe drinking water, Community development activities, Technical education, self-help group's development, Income generating activities and improving their hygienic living conditions.

We thank God in all our achievements and giving us the opportunity in upbringing the lives of the downtrodden communities.

Director  
Smile always Foundation

# Our Vision

“We are dedicated to care children, promote independence and build strong families through activities with the resources available.”

# Our Mission

Vulnerable children, their families and communities are developed towards wholesome future filled with hope, dignity, justice and peace.

Smile always Foundation (SAF) is a non-governmental organization registered with Government of India to undertake relief, welfare and developmental programs for rural poor. SAF has been working for uplifting the poor and downtrodden people especially women and children in rural areas for the last 15 years in Andhra Pradesh & Telangana in India.

Since then the SAF is involved in Child care and education, literacy for illiterates, water for poor communities, Health care interventions, HIV/AIDS awareness, capacity building initiatives, women empowerment, Saving based credit programs, relief at the times of natural calamities. The SAF commenced its ministry from 2005 by providing Food, Shelter and education to the Orphan, semi-Orphan, destitute and underprivileged children in some of the backward areas in Andhra Pradesh and Telanagana States.

### **Core Values**

- Work with dedication
- Attitude of Love and justice
- Committed for transparency and accountability
- Human Kindness with humility
- Sustainable development
- Learning organization

## Orphanage Project

The foundation is running orphanages in Hyderabad. We have established orphanage's during the year 2005 with a humble beginning of supporting 6 children that grew to 26 boys and 25 girls now. All the children come from slum and backward areas. There are orphan, semi orphan and poor and needy children in the orphanages. And Children homes for care and support for the children to make them happy, healthier and educated.

The Children are admitted in good school to pursue their education. 70% of Children attend School and rest of them in College. Most of the Child has completed their academics and promoted into higher classes.

All the Children are provided with nutritious food and basic facilities in the Orphanage. The Children are being brought up with good discipline.

**Food:** Healthy and Nutritious food is served for the Children Three times a day including Snacks every day in the evening time.

**Education:** Ensured all the Children enrolled in School/ College and receiving individual academic support at the Orphanage. Children are attending School/ College regularly and Studying well. Coaching classes are conducted after the School hours to reinforce their learning habit.

**Clothing:** Three pairs of clothing are supplied to the children in the Orphanages every year.

**Celebrations:** Festivals of National importance and Children Birthdays are celebrated in the Orphanage.

**Medical Care:** Delivered prompt medical care to children when needed.

## Drinking Water Bore Wells

During the year 2012, Water well program started in backward and drought hit areas. Since then SAF provided about 143 wells (new and replace) in drought hit districts of Prakasam, Kurnool, and Ranga Reddy districts in Andhra Pradesh and Telangana, India.

As reported in India millions of deaths each year due to water borne diseases and it accounts for one third of the global deaths due to disease spread by contaminated food and water. Most of the victims are children under five years of age, and diarrhea, followed by hepatitis account for water borne diseases in the country. The reasons for such a high toll due to water borne diseases are lack of safe drinking water, and food hygiene conditions etc.,

Water borne diseases become more pronounced during summer due to scarcity of safe drinking water. People, especially children suffer due to lack of potable water and the women trek long distances to fetch a pot of water. Even in some areas a pot of drinking water is sold for Rs.15/- to Rs.25/-.

The people particularly women in these areas are dependent on bore-wells and where bore-wells are not available, women have to trek minimum two kilometers for just a pitcher of water.

*Girls trek long distances under sweltering conditions to fetch drinking water - a common sight in rural parts.*

The summer season is very hot in these districts with temperature reaching 40-46 degrees centigrade. Fire accidents are very common during hot summer months of April and May. People suffer due to lack of safe drinking water.

The provision of Drinking water in drought areas fulfilled the prime requirement of the people in these areas. "Water most Sacred symbol of life".

The major beneficiaries from the programme are women and children. The programme has made available clean and safe water accessible in the neighborhood. The women have been saved a lot of time in fetching water trekking long distances. The impact was on development of community, family and individuals.

## ICDP Programme

Integrated Community Development program (ICDP) to serve the backward communities where the family is benefited rather than an individual child. In this new approach the children receive opportunity to pursue their education while the parents are provided with an opportunity to develop new skills and participate in group activities and also inculcate habit of savings to develop them to reach sustainability. With a small beginning of 50 children in this program it is also expanded further and the present strength in this program is 570 children. This is a family focus program. Through this program over 600 families are being benefited. These families are on the path of development to reach sustainability. The activity components of ICDP are Child Education Opportunities, Group Formations and development, Literacy and awareness, Health awareness, Vocational skills training, Savings groups and Income generating activities.

- We provide education for identified children.
- We develop community groups as basis for capacity building.
- We undertake basic literacy activity, health awareness and skills training to Parents of identified children and others in the community.
- We develop savings based credit system to establish Income Generating Activities.
- We provide relevant training for Field Staff for their development.

### ICDP In a nutshell.....

- 570 identified children in the communities provided with educational opportunities viz., Books, School supplies, Uniform, coaching classes for those who are poor in studies.
- Field staff to implement the activities.
- Target area consists of about 8 villages. Targeting poor and marginalized communities
- Parents of the identified children and some others motivated to form into Groups
- Building the capacity of the group members
- Creating opportunities for groups to learn new skills
- Health awareness
- Inculcating habit of Savings. 40 groups with 450 members
- Encouraging savings based credit system
- Enabling to establish Income Generating activities.

## Our Appeal:

We praise God the He has given us 17 years of glorious service through which He enabled us to work for the just and caring society and to transform many destitute lives to shining stars.

In our experience we find hostel system is the most proven method in providing child care to the poverty stricken children / orphans like rag pickers, street wanderers, slum dwellers and shoe cobblers. By God's grace, we could provide child care to 75 destitute children at a time in our hostels.

God in His mercy has strengthened our teams to face the challenges of natural disasters like Floods and Fire mishaps. Yes all these years, we could share God's love with the victims of disasters and received commendations both from the public and government. But the catastrophe of global recession crippled and disabled us to take up any relief and rehabilitation programs.

Still poverty, illiteracy, injustice and oppression are ruling our country. Therefore there is an enormous need to take up child care programs, integrated community development programs, relief and rehabilitation programs. And now we are facing heart throbbing experiences when the needy and destitute turn to us for help.

## Our Petition:

Even at this time of crisis, we cling on to the God's eternal promise "I will never leave thee, nor forsake thee". And we would like to exercise our faith in our God Almighty.

But as the Scripture urges that "Let us consider one another to provoke unto love and to good works" , we invite all God's people to become partner of this great movement to build the lives of needy and destitute as the dignified citizens of the Kingdom of God. Therefore, we humbly appeal you that we need all your prayers and support to continue this vast amount of work.
